Come and explore the hidden treasures of nature in Trempealeau County!

Learn and perform field and laboratory techniques used by scientists studying our streams, lands, and wildlife. Go deep in to the woods to carefully listen and monitor birds using binoculars. Identify and learn about plants, trees, and animals living in the floodplain forest of Pietrek Park. Navigate the trail system and discover hidden treasures using aerial photographs and land maps. Gain a better understanding of why wetlands are so important and how their soils are like sponges!

Camp size is limited to 60 participants to ensure hands-on participation.

REGISTRATION OPENS MARCH 15, 2020!

*Additional information on camp activities and supplies needed will be sent to parents upon registration via email and by letter prior to camp.
