Working together to protect drinking water
County Land & Water Conservation Departments

Conservation Department Services

- Develop Land & Water Resources Management Plan to identify land use priorities
- Install conservation practices to restore and protect resources
- Provide technical assistance to landowners
- Assist landowners in securing funds for cost-sharing opportunities
- Advise county board on resource protection ordinances

Partner with Conservation

- Connect with rural homeowners
- Understand nutrient management and identify potential sources of nitrate
- Identify funding for land owners interested in protecting or enhancing drinking water
- Identify wells eligible for abandonment
- Collaborate on a private well sampling program

Wisconsin Land & Water Conservation Association (WI Land+Water)
We support Land Conservation Committees and Departments in helping landowners and users meet their objectives while protecting our common economic and environmental infrastructure - land and water resources.

Connect with us online at wisconsinlandwater.org
